Champions League

Erling Haaland after scoring a brace

The UEFA champions league is an annual club Football competition. It is organised by the Union of European Football Association (UEFA). It is one of the most prestigious club competitions in the world. This competition began in 1955. This year the first leg, round of 16 happened last week. The results of Week-1 were:-

Match 1 - Atlético Madrid hosted the European champions Liverpool and surprised them as Saúl scored in the 4th minute to give Atlético the lead. The rest 86 minutes Diego Simeone's men parked the bus to deny Liverpool any open chance. The score remained at full time 1-0.

Match 2 - Borussia Dortmund took on PSG. The star of the show was Erling Haaland. The Norwegian scored in the 69th minute. Neymar Jr scored the important 'away' goal in the 75th minute. Erling had the last laugh as he scored a stunning goal in the 77th minute and won the game for Dortmund 2-1.

Match 3 - Atalanta netted four past Valencia. Denis Cheryshev scored a consolation goal in the second half at full time the score was 4-1.

Match 4 - Tottenham hosted RB Leipzig. Timo Werner scored the only goal in the match in the 58th minute score at full time 0-1.

March 20, the D-day of Justice

The fight started in the year 2012, and is yet to end with its final verdict by Supreme Court, to be hanged on 20th March 2020 at 05:30 a.m. Yes we are talking about 'Nirbhaya' case.

After 8 years of fighting, finally the court declared its verdict against the four accused, Mukesh Kr. Singh, Pawan Yadav, Vinay Sharma & Akshay Kr. Singh. As per the last finding of facts the accused were supposed to hang on 3rd March 2020. But due to the curative petition

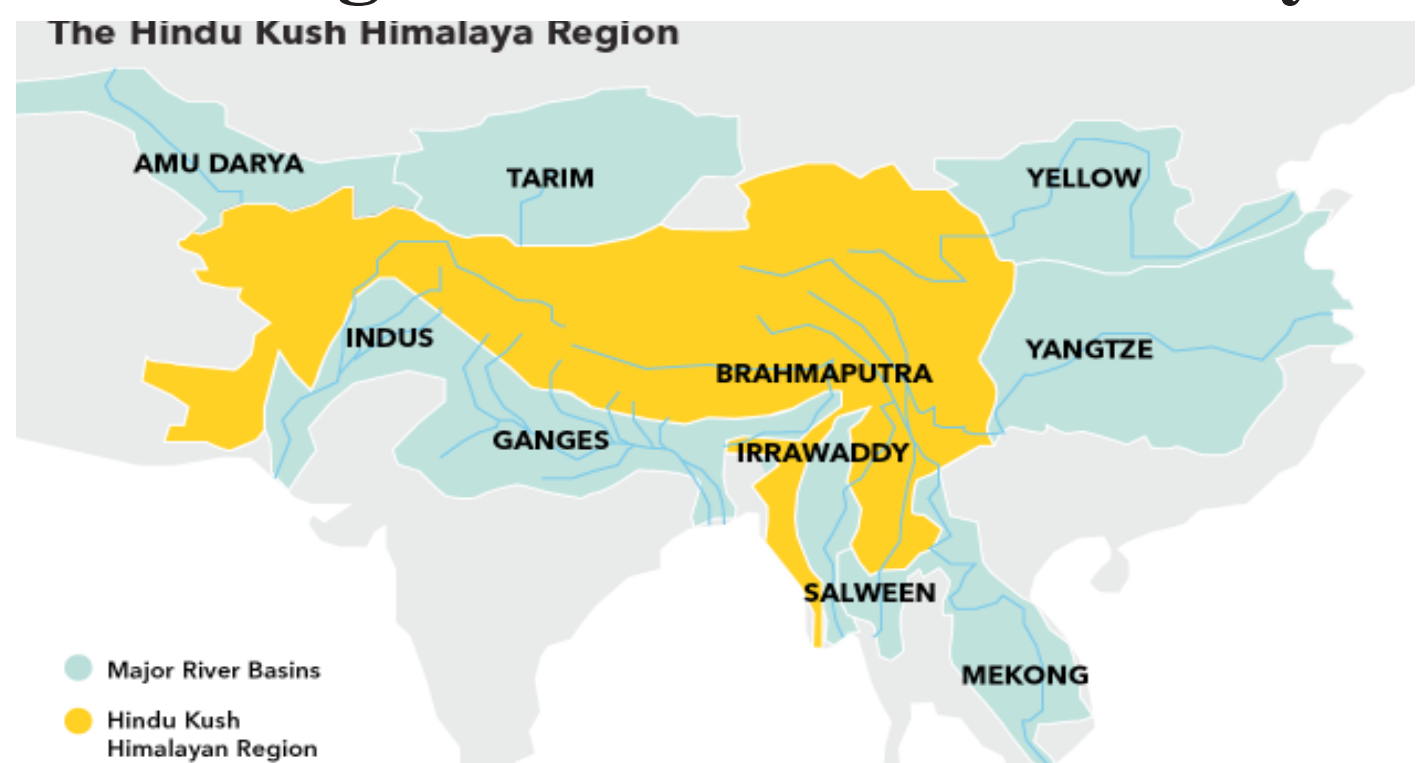

to Supreme Court & mercy petition for lifetime imprisonment to the President of India, Ram Nath Kovind, the judgement on execution of the death warrant was held back. In spite of the mercy plea, one of "Nirbhaya's" main accused Pawan Gupta has no way of a narrow escape.

The whole country is waiting for a fair justice for the 23 years old girl. With dreams in her eyes, the sky was the limit. After the incident, while her treatment was being

carried out, she was still hopeful of a fuller life. She was taken to Singapore for further treatment. But all was in vain. Within two days she completed her last phase of her life's journey.

We are talking about all such Nirbhaya's who sacrificed their smiling faces in front of the society, they lived in, in front of the Court of Law without justice. Now we all are waiting to witness another Justice for that young girl which would make every Indian satisfied.

Rising Urbanisation vs Decay

The Hindu Kush Himalaya region is one of the largest freshwater supplies to planet Earth with Asia's largest six rivers. Covering the South Asian HKH (Hindu Kush Himalaya) region are the river basins of Indus, Ganges & Brahmaputra through Pakistan, India, Nepal & Bangladesh. It also includes the North Tibetan and Chinese region with rivers Mekong Yangtze & Yellow. Ranging for 3500 km from Afghanistan in the West to Myanmar & China in the East and through Pakistan, Nepal, India, Bangladesh & Bhutan the region is characterized by a range of climatic conditions from the tropical to the alpine. Fast Urbanisation is

driven by multiple bio-physical & socio-economic conditions in the region. Large scale movement of labour forces & students migration from surrounding rural areas have happened in search of better education & opportunities. The increasing tourism services sector, leading to urbanisation is also becoming a reality in this region even with its distinctive physiographic conditions.

World's partial population dwelling in urban centres is likely to increase to 66% by 2050, according to a journal study. Insufficient water resources is resulting in high degradation in the eco-system. World Economic Forum report 2017, Geneva Switzer-

land recognized that water crisis in urban centres are one of the major global risk factors & high risk potential issue of geopolitics. The absolute mountain population is lower than that in the plains due to geographical limit. However, the rapid urban growth in the HKH (Hindu Kush Himalaya) are being examined. As environmental degradation due to climate changes is a source for the cause. The population growth has led to an over exploitation of water resources pushing the dwellers to a state of misery. What will be the result, if the gap between urbanisation & water resources does not bridge together? Its a matter of global concern.

‘Science Will Make Future’

The Science day is remembered for the discovery of the “Raman Effect” by renowned Indian Noble laureate at Physicist Sir C.V. Raman. The Institute’s Innovation Cell of Brainware University, collaborated with the various Departments of the University and organised a seminar on National Science Day on 28th of February 2020.

The seminar started with the speech of Professor Dr. Basuddhananda Das and Professor Joydip Chandra Hazra. They both spoke about their views, on modern science & technology. They also explained about science, innovation and contribution of women in the field of Science. They stated, that the motive to organise the seminar was to recall this day as they could learn a lot from this session.

The students should always remember the contribution of the Scientists, in the development of Science and Technology. More positive thoughts filled the ambience when the Asst. Registrar Ms. Anandita Das stated that “the present is not in our hands, but the future is and we will make it great”.

Activities like slogan writing and poster making patterned an interested part of the seminar. Sarmishtha Singh from BBA LLB came first in poster making competition and Mridutpal Bhattacharyya from BBA LLB had the opportunity to represent his writing based on the theme of the day. It was a proud moment for the students and the department they represented. With the declaration of competition results, the seminar came to an end.

‘Brainwave’ makes a beginning

Students at Brainware University's Book Fair

Wonderful news for the bibliophile and the students who love to write. Along with the book fair, the Department of the Library took a step forward with an unique idea of ‘e-journal’ named ‘Brainwave’.

Their event was an official inauguration of ‘Brainwave’, where the 1st edition was dedicated to the students of Brainware university. Ms. Bandana Basu, the Head of the Central Library of University, stated that ‘Brainwave’ will be a platform for the faculties and the students to showcase and publish their

research work. This initiative demanded a kick start and this event which included two days of book fair cum exhibition and a seminar were the perfect ground of ‘shubharambh’.

The Book Fair was scheduled on 3rd & 4th of March 2020, where Dr. Pritam Gurey and Dr. Joydeep Chanda were invited as the chief guests of the 1st day seminar. The 22 students who has already shown their interest to publish their research on ‘Brainwave’ has got the opportunity to present and speak about their work in front of the eminent

guests, university professors and fellow friends. Lastly the students were rewarded with certificates for their paper presentation. Also, book-fair gave them a large number of books for study and reference for their projects and research work.

Counting the footfall in the event, both in seminar and book-fair, we must admit it was a successful event. Many students were inspired and encouraged by their friend’s paper work for the e-journal and may participate in the upcoming editions. we hope the best for ‘Brainwave’.

Donating blood a selfless act

Students registering for blood donation

Students donating blood

Nowadays there is so much violence, so much bloodshed. Frequent riots are destroying humanity. On the other hand, initiatives like a blood donation is a helping hand to humanity.

A blood donation camp was organized on Friday, 28th February, at Brainware University campus. This camp

was organized with the help of Barasat District Hospital. Doctor of Barasat District Hospital, Dr. Gunadhar Singh Sarkar and the chairman of Barasat municipality, Sri. Sunil Mukharjee were present in the event. The initiative of this blood donation camp was appreciated by the pro vice Chancellor of the

University, Dr. Subhashis Banerjee. He was also one of the donors who was kind enough to help in this great initiative.

Around 85 students participated in this camp and many professor’s were also there to support this cause. This camp started at around 11 am and ended by 5 pm.
