## About The Conference

The realization of one's full potential as well as the development of a just and equitable society is both essential for the advancement of a nation. Education is a key foundation of any society. In order to adapt to the evolving state of knowledge and establish international educational standards, the National Education Policy-2020 (NEP-2020) aims to implement considerable reforms in higher education. This requires an extensive awareness of the rules and the strategy for their efficient implementation. This conference aims to give all education stakeholders—regulators, management, faculty members, researchers, industry experts, and policy makers in the field of pharmacy—a common forum to discuss the NEP-2020 various points of view, comprehend how it will change higher education, and debate any practical difficulties that may arise during implementation. The objective is to make possible suggested reforms understandable and make it easier to create a plan for their successful implementation in the pharmacy framework. To make education more thorough, flexible, skill-based, multidisciplinary, and holistic in order to nurture professionals who are future-ready, socially responsible, and possess strong moral values. To make it easier to realize the aim of transforming India into a dynamic knowledge society.

# Objectives of Conference

## To guide the students:

- To raise awareness of the National Education Policy 2020 approaches in the field of Pharmacy.
- To make outcome-based pharmacy education as per the present day need of the pharmaceutical industry, healthcare system in India, modern pharmacy practice etc.
- To envision a distinctive educational system that complies with the industry strong educational criteria.
- To recognize and address curriculum gaps that prevents students from achieving future learning objectives.
- To exchange ideas about how to progress towards a holistic education.
- To contribute to the attainment of the goal of making India a thriving knowledge society.
- To encourage networking and idea exchange between national and international stakeholders.
- To discuss the required regulatory reforms, faculty up-gradation and student flexibility integral to effective implementation of NEP.
- To establish a framework for multidisciplinary financing, education, and research.

# About Brainware University

Brainware University Kolkata, a part of a 32-year-old leading education group, Brainware of West Bengal, started with the aim of contributing to nation-building through research, innovation and quality education.

It is the brainchild of Mr. Phalguni Mookhopadhyay, its hands-on chancellor, whose acumen and vision have transformed Brainware University into one of the best crucibles of learning in a short period of five years.

Established in 2016 as a UGC-recognised, private state university in West Bengal, Brainware University offers over 55 PhD, PG, UG, Diploma and Skills programmes to over 10,000 students on its state-of-the-art, sprawling, green, ragging-free campus.

## About The Department Pharmaceutical Technology

The Department of Pharmaceutical Technology was established in 2017 at Brainware University Campus. The Department is well equipped with state-of-the-art infrastructural facilities for teaching and research. Pharmaceutical Technology is increasingly becoming interdisciplinary and occupying its position at the essential point of various scientific queries due to its assortment. The Department of Pharmaceutical Technology at Brainware University provides high level quality teaching along with modern instruments and well-furnished laboratories to cultivate curious and inventive scholars such that they become competent enough to face the challenges from academic as well as from industry.

## Vision

The Department of Pharmaceutical Technology aspires to be a globally recognized center for drug development and healthcare. The Department will operate in close liaison with the pharmaceutical industries worldwide and facilitate students with multiple job opportunities. It also motivates students to conduct socially relevant research and contribute for the betterment of the society.

## Mission

- The department pioneers interdisciplinary approaches to address the diverse needs of the people.
- It provides quality education by contemporary and modernized technologies.
- It assists students to acquire certain entrepreneurship skills to set up businesses in the field of pharmacy and help the country to grow economically.
- It also enables the students to develop a keen interest in pharmaceutical research and higher studies.

## Ongoing Programmes

D. Pharm (60)

B. Pharm (100)

M. Pharm (Pharmaceutics)

## About Association of Pharmaceutical Teachers of India (APTI)

The association was founded by pioneers of Pharmacy education in India in 1966 by leading personalities like Prof. M. L. Schroff, Prof. G. P. Srivastava and others, have come a long way in creating a better intercommunication and promotion of excellence in Pharmacy education. Through their tailored mission and objectives, the association has provided a single platform in bringing together teachers of pharmacy education through exchange of views from all over the country. This has helped in achieving excellent standards and to develop new technological methods in pharmacy education through exchange of views among teaching members. The emergent world today, with unbelievable sophistication under its belt, demand technical and knowledgeable pharmacists. The contributions of the teachers are thereby quite demanding. A teacher apart from just an educator also contributes to science as a researcher, helps in business development as a consultant to pharmaceutical industry and also creates an awareness as a community pharmacist.
